DELIVERING SOCIAL VALUE THROUGH PB4

APPOINTED COMPANIES AND CLIENTS, TOGETHER

The PB4 framework includes a commitment to deliver increased added value by clearly defining social value to be delivered, and systems for measuring and monitoring it. A copy of the Invitation to Tender (ITT) Social Value Objectives and Expectations appendix is summarised here for your convenience.

The appendix outlines the way in which LHC Procurement Group appointed companies will support, facilitate and influence public sector contracting authorities in maximising the opportunities to increase social value delivered through PB4 projects.

Furthermore the PB4 Social Value Objectives and Expectations Appendix sets out social value priorities and measures for this framework, aligning the nature of the framework and partner priorities.

The highlighted segments show the key social value impact areas that PB4 aims to deliver

Appointed companies are expected to collect and social value reporting to LHCPG. Template quantitative measurements are set out below:

- What new services have been made available with the new building?
- How many individuals have benefited from being upskilled or training in the community?
- How much waste has been diverted from Landfill (tonnes)?

Appointed Companies are expected to make every effort, in agreement with the client, to collect and report to LHCPG qualitative measurements:

Template Perception / Qualitative Resident Survey Feedback

- Are you able to access services previously unavailable locally?
- Do you take part in any social or community groups in the new buildings?
- Has the new buildings and their surroundings provided improved greenspace?

AND USEFUL CONTACTS

PB4 Social Value Reporting

To make social value outcomes reporting as straightforward as possible for appointed companies, you will receive a link to our Impact Reporting platform at the completion of each project. This will provide an on-line solution to capture social value data for each project and will be used to inform the development of case studies and share reporting for you and your client.

Social Value guides

To support appointed companies and their clients, to deliver more social value through projects awarded via the PB4 framework, we have created guides and tools to aid you.

These can be downloaded at: www.lhcprocure.org.uk/social-value/pb4resources

Social Value Plan Template

This template can be used to agree, with the client the social value objectives for the project. At the time of 'call-off' or kick-off' stage, it can be useful to have a conversation about possible community opportunities in the area where the project is being delivered. This will help identify and understand social value outcomes that can be delivered by the project.

Where appropriate and relevant, you can use and reference the social value themes and measures outlined in the Social Value Objectives and Expectations Appendix.

Please share your completed social value plan with us via email to: socialvalue@lhcprocure.org.uk.

Social Value Toolkit

To access all documentation related to social value via PB4 framework, please visit the following link: www.lhcprocure.org.uk/pb4resources
